MARINE SHIELD Ultraflex
DESIGNED FOR THE PROTECTION OF RIB TUBES

- Increase the life of RIB tubes with Ultraflex UV stable paint protection.
- Apply to new RIB for overall protection or to pre-loved tubes for a face lift to look new.
- Hydrophobic - Repels water aiding cleanliness and weight efficiency.
- Algae, fungi & mould inhibitors.
- Chemical and oil stain resistant.
- High rate of flexibility, chafing and scuff resistant.
- Lightweight approx. 50 - 60 microns thickness.

For further information, call our team now on +44 (0) 23 8212 8444 or email us at info@oceanflexiblecoatings.co.uk

Marine Shield Ultraflex paint provides a high quality UV protection which reduces the penetration of UV rays through to the substrate, resulting in increased longevity, fabric looks cleaner and there is a marked reduction in colour fading.

Ultraflex is a proven product that has significant case history, with over 8 years of use in the extreme weather conditions of New Zealand.

Frequently asked questions

How much paint do I need and How much does it cost?

We have two sizes:

3 meter kit will cover up to 6 sqm total coverage.
6 meter kit will cover up to 12 sqm total coverage.

A 3 meter kit costs £299.99 + VAT
A 6 meter kit costs £599.98 + VAT

Delivery is priced on your location.
Additional kits will be required for larger Ribs.

What else do I need?

The kit includes: coatings, instructions, safety data sheets and all consumables required for application by brush and roller.

Included consumables:

- 4 x Pairs of gloves (solvent resistant)
- 1 x Safety Glasses
- 1 x Respirator Mask (with valve & active carbon filter)
- 2 x P180 Grit Wet/Dry Sandpaper (for Hypalon)
- 2 x Red Scotchbrite Pads
- 12 x Wipes
- 2 x Rolls of Masking Tape
- 4 x Measuring/Mixing Cup
- 4 x Stirring sticks
- 4 x Paint Filters
- 4 x Foam Rollers
- 1 x Paint Brush
- 1 x Paint Roller Tray & roller handle

Can Ocean Flexible Coatings apply it for us?

Yes, you need to bring the boat to our approved application centre Ocean Art Ltd, where they will apply Ultraflex in a controlled environment.

For application costs please contact us.

The process for a 5-6 meter RIB takes around 3 days, longer on larger vessels.

When you compare the costs to replace the tubes versus the cost of paint and application, Ultraflex is typically LESS than half the price.

How long does it last?

In the UK our conservative estimate is 5 years, however in the southern hemisphere where the UV is stronger like in the harsh maritime conditions of New Zealand, there are vessels that were painted in excess of 8 years ago that still look and perform like new.

Why should I use Ultraflex?

There are other tube paints on the market however they do not have the UV inhibiting properties, stain resistance and the easy clean functions of Ultraflex.

Ultraflex also has up to 25% expansion / elasticity in the coating.

To our knowledge there is no comparable paint anywhere else in the world.

Is it stain resistant?

Ultraflex has excellent resistance to a variety of chemicals, e.g. petrol, oil, diesel, soot/carbon particles from exhaust fumes, acid rain, grease, turpentine, thinners etc.

It also contains self-healing properties which reduces wear and tear and ensures the product protects the tubes for longer.

Will it stick to my Rib?

If your Rib is Hypalon or PVC then yes, the tubes will need to be prepared following the instructions included in the kit.

Ultraflex has a high adhesion capability, up to 3000 psi water blasting tested.
